## SKILLS

<b>Programming Languages</b>	C++, Python, Haskell, JavaScript, Rust
<b>Frameworks &amp; Tools</b>	LLVM/Clang LibTooling, CMake, Perf, Valgrind, SQLite, pkg-config
<b>Web Technologies</b>	Flask, PostgreSQL, Nginx

## PROFESSIONAL EXPERIENCE & PROJECTS

<b>Bloomberg L.P.</b> <i>Software Engineer, Code Governance</i>	<b>Apr 2018 – Present</b> <i>New York City, NY</i>
--	---

<b>Patch Generation Framework</b>	Python
<ul style="list-style-type: none"><li>Created, maintained a tool to help a client base of 5000 Bloomberg developers run our refactoring tool offerings</li><li>Integrated with internal code indexing service to generate on-demand patches from various refactoring presets</li><li>Automated the end-to-end refactoring workflow for clients to ensure productivity and reduce review fatigue</li></ul>	

<b>C++ Legacy Code Migration Tool</b>	C++, LLVM/Clang LibTooling
<ul style="list-style-type: none"><li>Maintained a Clang LibTooling-based tool to replace pointers to shared memory with equivalent function calls</li><li>Added features such as static bounds checking and redundant include deletion</li><li>Exposed critical bugs and misuses in a refactoring effort affecting <math>\approx 2000</math> legacy projects</li></ul>	

<b>Service for Source Code Intelligence &amp; Indexing</b>	Flask, Python
<ul style="list-style-type: none"><li>Created a pair of RESTful services to store, and retrieve projects and their metadata</li><li>Designed an API specification for queries on the metadata associated with these projects</li><li>Enabled periodic, background analysis of the entirety of our code base of roughly 13000 projects</li></ul>	

<b>C++ Header Dependency Tracer</b>	C++
<ul style="list-style-type: none"><li>Optimized a tool that parses the <code>#include</code> statements in a C/C++ source file to list header dependencies</li><li>Cached results by file path to reduce I/O, achieved speed-up of <math>\approx 2\times</math></li><li>Used <code>perf</code> to profile tool performance, and reduced the number of <code>open</code> syscalls, achieved speed-up of <math>\approx 6\times</math></li><li>Achieved performance match with <code>gcc</code>, <code>clang</code> for a single file, speeding up linearly in the size of bulk queries</li></ul>	

<b>Cross Platform Symbol Demangler</b>	Flex, C++, LLVM/Clang LibTooling
<ul style="list-style-type: none"><li>Created a tool from scratch to parse mangled C++ names from various non-linux compilers like: <code>xlC</code>, <code>SunStudio</code></li><li>Reverse engineered patterns in mangled name generated by target compiler into a <code>flex</code> grammar</li><li>Created a comprehensive test suite to document the grammar's properties</li><li>Used in a large-scale structured code search project to index all of the code base of 13000 projects</li></ul>	

<b>GNU Linker Script Parser</b>	ANTLR4, Python
<ul style="list-style-type: none"><li>Created a parser using ANTLR4 for GNU Linker Scripts to aid in parsing and tracking transitive link-line dependencies</li><li>Used as a base component by tools that validate and fix linker dependency information of every C/C++ project</li></ul>	

<b>University of Florida</b> <i>Research Intern</i>	<b>May 2017 – Dec 2017</b> <i>Gainesville, FL</i>
--	--

<b>Automatic Terrain Identification</b>	C++, CUDA, gprof
<ul style="list-style-type: none"><li>Responsible for accelerating part of the MPI code base with CUDA kernels</li><li>Achieved speed-up for <math>200\times</math>, reducing run-time from 65min to 20sec</li></ul>	

## EDUCATION

<b>Master of Science, Computer Science</b> University of Florida <i>Coursework: Programming Languages, Analysis of Algorithms, Data Structures, Machine Learning</i>	<b>Aug 2016 – Dec 2017</b> Gainesville, FL, USA
--	--

<b>Bachelor of Engineering, Electrical and Electronics Engineering</b> Birla Institute of Technology and Science - Pilani <i>Coursework: Analog and Digital VLSI Design, Microelectronic Circuits, Communication Systems</i>	<b>Aug 2010 – May 2014</b> Pilani, India
--	---
